**Annual Examination**

English For Today : Unit 6-10 & 11 (Lesson : 3, 4, 5, 9, 10 & 11)

**Story :**

## Choose the best answer from the alternatives.

- (a) Where has the carbon dioxide raised alarmingly?  
     i. in the sun                          ii. in the ocean
- (b) The word 'atmosphere' refers to \_\_\_\_.  
     i. appearance                         ii. sunlight
- (c) The word 'enormous' refers to \_\_\_\_.  
     i. meagre                               ii. limited
- (d) How does the energy come?  
     i. Through the combustion of coal  
     ii. Through the sun's radiation
- (e) What do the factories require?  
     i. water                                ii. energy
- (f) The word 'crude' stands for \_\_\_\_.  
     i. durable                            ii. changed
- (g) The word 'pasture' stands for \_\_\_\_.  
     i. field for storing corn  
     ii. field for tending cattle    iv. a place for swimming
- iii. in the earth                        iv. in the atmosphere
- iii. fair weather                        iv. climate
- iii. huge                                iv. little
- ii. Through the combustion of water  
  iv. Through the human resources
- iii. air                                    iv. sunlight
- iii. modernized                        iv. unchanged
- ii. field for playing tricks

 $2 \times 5 = 10$ 

## Answer the following questions in your own words :

- (a) What is the passage about?  
  (b) How can the world be greener?  
  (c) What do the factories need and how is it produced?  
  (d) Mention some greenhouse gases.  
  (e) "Human beings can protect this beautiful earth to a great extent by their wise activities." Do you support the view? Why/Why not? Mention some greenhouse gases.

 $1 \times 5 = 5$ 

## 3. Read the following text and fill in each gap with a suitable word based on the information of the text.

Air pollution comes from a wide variety of sources. In Bangladesh poisonous exhaust from industrial plants, brick kilns, old or poorly serviced vehicles and dust from roads and construction sites are some of the major sources of air pollution. We can minimise this type of pollution by making less use of motor vehicles and

we can minimise this type of pollution by making less use of motor vehicles and avoiding the use of vehicles older than 20 years. We may also use proper lubricants to lessen the level of emission and pollutants. We can encourage people to use compressed Natural Gas (CNG) or Liquid Petroleum Gas (LPG) for fuelling their cars. The government may relocate hazardous industries like brick kiln to areas from human habitations.

[Unit-2, Lesson-2(B)]

- Among all the elements of the environment air is the most important one. We cannot (a) \_\_\_\_ a single moment without it. Unfortunately, this vital element is continuously (b) \_\_\_\_ polluted in many ways. Our (c) \_\_\_\_ activities are mainly responsible for it. So, the (d) \_\_\_\_ of air pollution is a must for our own existence. We should also (e) \_\_\_\_ environment friendly activities for decreasing air pollution.

**Read the following text carefully and answer the question no. 4 and 5 :**

**Topic : Jibonanando Das**

Jibonanando Das was born in a small town of Barishal in 1899. He took his Master's Degree in English at the age of 22. The next year, he started his teaching career as a professor of English at kolkat city college. He lost his job in on the charge of publishing a poem in hte 'parichaya' patrika. But two years later, he joined the Ramjash college, Delhi, he returned to his birth place the next year. He got an appointment in Brajamohan college, Barishal in 1935. In 1947, when the partition was made, Jibonanando Das left Bangladesh for India. In West Bengal, he started editing the 'Swaraj' patrika. In 1951, he joined the Kharagpur college. He was awarded Rabindra puraskar in 1953. He met with a tram accident on the 14th October 1954 and was hospitalized. After a few days, he passed away on October 22,1954.

**4/ Read the passage and complete the following table with information from the passage.**

$1 \times 5 = 5$

Who/What	Activities	Where	When
Jibonanando	born	(i) ____	in 1899
He	M.A	English	(ii) ____
Career	(iii) ____	Kolkata City College	in 1922
	Migration	(iv) ____	in 1947
(v) ____	award		in 1953

Special Model Tests and Answers [Paper-I]

3. Read the following text and fill in each gap with a suitable word based on the information of the text.

Water pollution spreads easily and quickly because different water sources flow together. The pollution occurs in oceans, rivers, lakes, ponds and underground reservoirs. The different causes of water pollution are improper waste disposal and littering; leakage of soil pollution into water supplies; organic materials that decay in water supplies. We need to be more careful about disposing any kind of waste. Chemicals that are used in agricultural fields, lawns or gardens as pesticides get washed by the rain into the water bodies. So, we must be careful about the dangers of using pesticides and throwing away any toxic substance on the ground near a water source for which water can be easily polluted.

Water pollution is such a pollution which spreads the (a) \_\_\_\_\_. The reason is that the water resources mostly flow together. (b) \_\_\_\_ wastes are the main source of water pollution. People should be more careful about disposing (c) \_\_\_\_ wastes too. If we pollute the (d) \_\_\_\_\_, it means we pollute the water as the toxic substances eventually reaches there. We must be aware of using pesticides in (e) \_\_\_\_\_ fields.

**Read the following text carefully and answer the question no. 4 and 5:**

Neil Armstrong commanded the Gemini-8 Mission and became the first human to walk on the moon as commander of Apollo 11. He was born in Wapakoneta, Ohio, on August 5, 1930. He received a Bachelor of Science degree from Purdue University and a Master of Science degree from the University of Southern California. Astronauts Neil A. Armstrong, Buzz Aldrin and Michael Collins launched the mission to the moon with Apollo 11, on July 16 and landed on the moon on July 20, 1969. Neil A. Armstrong first stepped on to the surface and then Aldrin. The three astronauts explored the surface and gathered moon rocks for over two hours.
